Journal of Advances in Statistical Learning and Data Analysis
Volume 1, Issue 1, 2026

Editorial: A Message from the Editor-in-Chief

Parviz Nasiri
Editor-in-Chief
Department of Statistics, Payame Noor University, Tehran, Iran

---

It is my great pleasure to welcome readers to the inaugural issue of the *Journal of Advances in Statistical Learning and Data Analysis* (JASLDA). The launch of JASLDA marks an important step toward providing an international forum for high-quality research at the intersection of statistics, statistical learning, and data-driven discovery.

The rapid growth of data science, artificial intelligence, machine learning, and computational technologies offers exciting opportunities while raising new challenges. Statistics remains central to these developments, providing foundations for reliable inference, uncertainty quantification, predictive modeling, and evidence-based decision-making. Progress is strengthened by the interplay of statistical theory, computational methods, and meaningful applications.

JASLDA welcomes original contributions in statistical inference, Bayesian and fuzzy statistics, statistical modeling, computational statistics, statistical learning, machine learning, data mining, artificial intelligence, reliability analysis, and related areas. We encourage work that advances methodology and addresses important problems across science, engineering, medicine, economics, and other disciplines, including research connecting statistical foundations with modern data-analytic practice.

We are committed to maintaining high academic standards through fair, constructive, and rigorous peer review. We value clarity, reproducibility, methodological soundness, and responsible research, and strive to offer authors a professional and supportive publication experience. The journal's quality will be shaped by the shared contributions of authors, reviewers, editorial board members, and readers.

I sincerely thank our Editorial Board for its support, our reviewers for generously sharing their time and expertise, and our authors for trusting JASLDA with their work. I also gratefully acknowledge Payame Noor University and the colleagues whose encouragement and efforts have helped establish this journal.

As we embark on this scholarly journey, I invite researchers, academics, and practitioners worldwide to submit their work and join our growing community. May JASLDA become a valued venue for exchanging ideas, advancing statistical methodology, and fostering data-driven knowledge.

Parviz Nasiri
Editor-in-Chief, Journal of Advances in Statistical Learning and Data Analysis
